**Chocolate Bronze**

Matt Black

Screwless cover plate options

The WLM range of screwless cover plates for the WCM 50x50mm push-button control modules are suitable for flush mount fixing into a minimum 35mm deep UK back box, using the grid supplied.

WLM screwless cover plates are available in eight standard finishes - shown overleaf. Custom finishes and double gang plates are subject to extended lead times. Plates are hand finished resulting in each plate being unique. Differences in colour of plate finishes shown in photos across Rako's website are due to lighting at the time of photography. Where engraving exposes natural brass the colour will organically age over time.

Cleaning Information

No abrasive or solvent-based treatment should be used. Plates, should only be cleaned with a soft, non abrasive dry cloth
